## NEW PARTNER ANNOUNCEMENT EUROFREIGHT SERVICES LTD. (Malta)

### Company Profile

EuroFreight Services Limited was founded back in 1999. Our main focus as a company was to provide the best logistical service in Malta where clients felt truly confident entrusting us with their cargo. In 1999 when EuroFreight started out we offered a variety of services primarily in Northern Italy.

Since then we have worked hard to become an uppermost NVOCC and road freight transporter, to and from Malta, a goal which we can proudly say have been achieved throughout our operating years. We have expanded our operations to offer logistical services worldwide including sea freight, road freight, air freight, warehousing, project cargo and value added. Lately we started offering the first LCL service from Shanghai to Malta. Last year, 2018, we grew our warehouse footprint and introduced new service points.

This year, 2019, as we are celebrating our 20th anniversary and entering our third decade of operations we have streamlined our internal operations and procedures along with implementing a new digital Management Information System - we feel confident that we are in a great position for further growth and better services moving forward.
